

# OUR OFFER IN DETAIL

## Subscription & Services

### BIM Design / Construction

#### Share your 3D model data in IFC format

Access to a multi-user web platform to share your IFC files in real time

Organise the user rights users for IFC & BFC projects

Communicate with BCF interoperable format

Access to data services to organize your IFC file (extract, modify, control, consult)

#### Efficiently collect field data to update your 3D models

Synchronise your data between Revit software and IFC files in the Cloud

Give access to data to non 3D experts

Have tools for real-time control of data conformity

Export your data in Excel, Csv Gltf or SVG

#### Making your digital deliverables more reliable

Audit the data quality of your IFC files (compliance with the standard) and correct any non-conformities

Create customised IFC files (descriptive and 3D data, choice of objects)

Trace the evolution of your IFC files (multi-version comparison)

Modify IFC files (class, attributes, properties, quantities)

Use data control and enrichment services

### BIM Operation / Real estate asset management

#### Audit of data organisation and structuring

Audit of IFC models and data compliance

Creation of a BIM operating charter

Creation of an asset repository from IFCs

Building native models into IFC format

Transformation of IFC construction deliverables into IFC file for operation

#### Modelling and connection with business tools

3D modelling of equipments / connected objects in IFC

Implementation process for updating IFC data

Connection of IFC models with business tools (CMMS, BMS, EDM, etc.)

Creation of dashboards and reports

#### Operation of the building asset portfolio

Creation of an asset database in open IFC format

Implementation of the communication tool between the teams (maintenance, administrative, purchasing, etc.)

Access to the 2D/3D visualisation and building data exploitation platform

Creation of queries to interrogate, modify and check the data of all your IFC buildings in bulk

## Services

### OpenBIM data management consulting

Creation of data repositories in OpenBIM

Implementation of quality controls of your IFC files

Build your indicators and dashboards based on the data in your IFC files

Creation of pdf reports based on IFC data

Training of your teams in data management

Setting up our platform to share and modify data in real time

### Web application design with IFC

Develop new web applications built from 3D IFC models

Build the technical specifications to meet your functional needs

Setting up the front-end interface, connecting with our APIs

Implementation of new services mixing IFC & other format data

Integration of our 3D engine to visualise IFC files in your app

### BIM integration in your business tools

Access the hundreds of services in our API to extract and collect data from IFC files

Organise your custom IFC files to extract data that can be used by your business software

Extract 3D and 2D interoperable data, Gltf and SVG from IFC files

Consulting for 3D engine integration based on IFC files

Connect in real time our API with your business tools

# CHOOSE YOUR ACCOMPANIMENT

Our approach to IFC simply allows you to do data management in real time.

Subscriptions are **complemented** with training, coaching and technical support. The volume of hours per category will be tailored to the number of users and their profile.  
**For the data organisation, consulting is strongly recommended...**

## Advice on organisation and data management

Assistance in the creation of data repositories, indicators and dashboards

By quotation

## Support for use & new services

By quotation

## Technical support on IFC files

File analysis & correction solutions

By quotation

## Expertise on the conformity of an IFC file

Analysis of non-conformities, correction

By quotation

## Training

Administration, expert, guests
